---

Eric,  
Your summary is complete & accurate. The only thing I noticed missing was that once Ben identified the list of data layers (done), Carrie would make sure the LWG's data set included (or she would insert) these layers so we all were working off the same layers.

Jim

Subject: Follow-up From April 1st Meeting

Here are my abbreviated notes and action items from yesterday's GIS discussion:

Delivery of GIS Tool:

After the meeting, I spoke with Carl Stivers of Anchor. The GIS tool was approved by the LWG Executive Team on Wednesday. We should be able to get the GIS Tool delivered to key people by Friday and the remainder of the technical team by early next week (Tuesday).

COCs:

I distributed the list from the eco team. We will still need to figure out how to best map benthic risk. Ben indicated that he had performed some of the benthic risk analysis that we did in June 2007 using new Round 3 sediment and bioassay data. I am still waiting to hear back from the human health team on PRGs. Dana is working on this.

Action Item: Eric will come up with list of key PRGs and exposure scale by early next week.

Web Ex Training:

Everything is good to go. We will focus on PCBs and benthic risk. We discussed the development of an agenda. It was agreed that the following elements would be part of the agenda: Objectives, GIS basics, Assumptions, Mechanics, Output and Next Steps.

Action Items: Carrie will develop an Agenda with input from Ben and Mike and forward to Eric (done). Eric will come up with list of GIS training attendees (done).

Availability:

Ben Shorr and Margaret Spence will have time to perform mapping tasks in preparation for the retreat. Ben will have a key role in the training session along with Carrie.

Data Layers:

We discussed the need for additional layers beyond what the LWG presented in the February 17, 2009 GIS tool presentation.

Action Item: Ben will come up with a list of layers (done)

Roles and Responsibilities:

We discussed the need for a table outlining the GIS team roles and responsibilities.

Action Item: Eric will develop table of GIS contacts (done).

Next Meeting Time:

We will have a call (using the TCT number) on Monday, April 6th at 3:00 pm PDT.

I know this is brief. Please let me know if I missed anything critical.

Thanks, Eric
